Lobe Sciences Ltd. Announces Closing of Upsize to Non-Brokered Private Placement

NOT FOR DISTRIBUTION TO U.S. NEWSWIRE SERVICES OR FOR DISSEMINATION IN THE UNITED STATES

VANCOUVER, BC / ACCESS Newswire / August 31, 2026 / Lobe Sciences Ltd. ("**Lobe**" or the "**Company**") (**CSE:LOBE) (OTCQB:LOBEF)(Frankfurt:LOBE.F**), a clinical-stage biopharmaceutical company advancing therapeutic development programs through focused subsidiary companies, is pleased to announce closing of the second tranche of its previously announced non-brokered private placement offering of common shares in the capital of the Company ("**Common Shares**") at a price of $0.085 per Common Share (the "**Private Placement**").

The Company closed the first tranche of the Private Placement on August 19, 2026 (the "**First Tranche**") through the issuance of 24,705,880 for gross proceeds of $2,100,000. As a result of further demand, the Company has closed an additional tranche of the Private Placement (the "**Second Tranche**"), comprised of 705,882 Shares for gross proceeds of $60,000. Following closing of the Second Tranche, the Company has issued an aggregate of 25,411,762 Shares for gross proceeds of $2,160,000 pursuant to the Private Placement.

The Company intends to use the proceeds of the Private Placement for working capital and general corporate purposes, and to advance its S-100 drug candidate for the treatment of sickle cell disease. A portion of the proceeds will be directed to its subsidiary, Applied Lipid Technologies, Inc., to support development of the S-100 program toward human clinical trials. The Company has procured the active pharmaceutical ingredient required for these studies, enabling the program to move forward.

All securities issued in connection with the Second Tranche are subject to a four-month hold period from the closing date under applicable Canadian securities laws, in addition to such other restrictions as may apply under applicable securities laws of jurisdictions outside Canada.

None of the securities sold under the Private Placement have been or will be registered under the *United States Securities Act of 1933*, as amended, and no such securities may be offered or sold in the United States absent registration or an applicable exemption from the registration requirements. This news release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of the securities in the United States or any jurisdiction in which such offer, solicitation or sale would be unlawful.

NEITHER THE CANADIAN SECURITIES EXCHANGE NOR ITS REGULATION SERVICES PROVIDER HAVE REVIEWEDOR ACCEPT RESPONSIBILITY FOR THE ACCURACYOR ADEQUACY OF THIS NEWS RELEASE.

About Lobe Sciences Ltd. (CSE:LOBE)(OTCQB:LOBEF)(Frankfurt:LOBE.F)

Lobe Sciences Ltd. is a biopharmaceutical company advancing programs in diseases with unmet medical needs. The Company is pursuing strategic development through its subsidiaries, including a majority interest in Cynaptec Pharmaceuticals, Inc. and wholly owned subsidiary Applied Lipid Technologies Inc. (Formerly Altemia, Inc.).

About Cynaptec Pharmaceuticals, Inc.

Cynaptec is a biopharmaceutical company dedicated to developing innovative therapies for neurological and psychiatric disorders. Cynaptec's initial development program is focused on the use of its proprietary L-130 (psilocin mucate) compound for treatment of the significant unmet medical needs of patients with Chronic Cluster Headache, with an additional preliminary proof-of-concept to assess potential utility for substance use disorders. Cynaptec is 64% owned by Lobe.

About L-130 (psilocin mucate)

L-130 is a novel, patented, oral, stable analog of psilocin, the active metabolite of the prodrug psilocybin, designed to enhance bioavailability and therapeutic efficacy, which has been identified as having therapeutic potential in a variety of neurological conditions. Whereas conventional psilocin is an unstable compound that has been challenging for the industry to develop as a standalone pharmaceutical, L-130's stability and bioavailability profile, and associated safety and efficacy signals, suggest the potential for prescription drug development in a variety of neurological and psychiatric indications.

Cautionary Statement Regarding "Forward-Looking" Information

This news release includes certain statements and information that may constitute forward-looking information within the meaning of applicable Canadian securities laws. All statements in this news release, other than statements of historical facts, including statements regarding future estimates, plans, objectives, timing, assumptions or expectations of future performance, including, without limitation: the anticipated use of proceeds of the Private Placement, the Company's statements regarding the S-100 molecule's potential eligibility for orphan drug designation, its intention to evaluate S-100's eligibility under the USFDA's Rare Pediatric Disease Priority Review Voucher Program, and the clinical development programs of its subsidiaries, including Applied and Cynaptec. Generally, forward-looking statements and information can be identified by the use of forward-looking terminology such as "intends" or "anticipates", or variations of such words and phrases or statements that certain actions, events or results "may", "could", "should" or "would" or occur.

Forward-looking statements are based on certain material assumptions and analysis made by the Company and the opinions and estimates of management as of the date of this press release, including, among other things, that: that the Company will be able to use the proceeds of the Private Placement as anticipated; that general market conditions will remain favourable; that the Company will have sufficient capital to advance its clinical programs; and that the regulatory environment for the Company's drug candidates will remain sufficiently favourable to permit the anticipated development and regulatory activities, among others. These forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the actual results, level of activity, performance or achievements of the Company to be materially different from those expressed or implied by such forward-looking statements or forward-looking information. Important risks that may cause actual results to vary, include, without limitation, the risk that: the Company is unable to use the proceeds of the Private Placement as anticipated; market conditions may deteriorate; risks inherent in early-stage biopharmaceutical development may materialize, including the risk that the Company's drug candidates may not receive regulatory approval or orphan-drug designation; and clinical development timelines may be delayed or results may not support further development..

Although management of the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking statements or forward-looking information, there may be other factors that cause results not to be as anticipated, estimated or intended. There can be no assurance that such statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements and forward-looking information. Readers are cautioned that reliance on such information may not be appropriate for other purposes. The Company does not undertake to update any forward-looking statement, forward-looking information or financial out-look that are incorporated by reference herein, except in accordance with applicable securities laws.
