

Northern Lights Completes MobileMT Survey to Advance Drill Targeting at Horetzky Copper Project in BC's Babine Porphyry Belt

Vancouver, BC – May 25, 2026 – Northern Lights Resources Corp. (CSE: NLR) (OTC: NLRCF) (FSE: 0ZH0) (“Northern Lights” or the “Company”) is pleased to announce that it has completed an airborne Mobile MagnetoTelluric (“MobileMT”) survey over its Horetzky Copper Project (“Horetzky” or the “Project”), located in the prolific Babine Porphyry Belt of central British Columbia.

The survey was completed by Expert Geophysics utilizing its proprietary MobileMT system. Approximately 120 line-kilometres were flown at 200-metre line spacing in an east-west orientation across priority target areas at the Project. This technology enables effective imaging, allowing the Company to identify potential deep-seated targets.

Luka Capin, CEO of Northern Lights, commented, “The completion of the MobileMT survey is another milestone in advancing Horetzky. Integrating this modern geophysical dataset, alongside the historical dataset, is expected to significantly enhance our targeting process as we prepare for the next phase of exploration. We are delighted to have the technical support of Steven McMullan, Registered Professional Geoscientist (P.Ge), whose experience with large-scale copper systems and reinterpretation-driven exploration is helping strengthen our approach at Horetzky”

About the Horetzky Copper Project

The Horetzky Copper Project is located in the Babine porphyry Belt of central British Columbia, a well-established porphyry copper district that hosts several significant copper-gold systems.

The Horetzky copper project is located in north-central BC in the Babine Porphyry Belt. The Babine Porphyry Belt hosts the past-producing Bell and Granisle copper mines, and numerous significant occurrences at Morrison, Hearne Hill, and Duke. Of particular significance is the Nak project operated by American Eagle Gold, the Horetzky project has characteristics of the classical porphyry style deposit model, exemplified by the Nak deposit operated by American Eagle Gold (TSXV:AE, OTCQB:AMEGF)

The Company also announces that, pursuant to its Stock Option Plan, it has granted stock options to directors, officers, employees and consultants to purchase an aggregate of 625,000 common shares at an exercise price of \$0.10 per share, expiring on May 25, 2028. The stock options vest one-third on the date of grant, one-third six months from the date of grant, and one-third twelve

months from the date of grant. The stock option grant is subject to acceptance by the Canadian Securities Exchange (the “CSE”).
