BRS Resources Active in British Columbia and Mexico

VANCOUVER, BC – August 25, 2026 – BRS RESOURCES LTD. ("**BRS**") (CSE: BRS) (FSE: B4G) and Cariboo Rose Resources Ltd. ("**Cariboo Rose**") (CRB: TSX-V) advise that they have finished cutting, sampling and shipping drill core samples from the Cowtrail porphyry copper gold project located 60 kilometers northeast of the City of Williams Lake, BC. 1,293 meters of drill core from 4 holes were processed with samples, typically 3 meters each in length, shipped to the facilities of MSA Labs, in Langley, British Columbia. Turn around from shipping to receipt of results is expected to be four to six weeks.

Cowtrail is a 4,717-hectare (11,650 acre) copper-gold project contiguous with the Woodjam and Redgold copper-gold porphyry projects owned by Vizsla Copper Corp. (TSX-V: VCU). It is located 20 kilometers southeast of the operating Mount Polley Mine (copper gold) owned by Imperial Metals Corporation which it shares many geological attributes with. BRS may earn a 60% interest in Cowtrail from Cariboo Rose by completing $2,000,000 in exploration, making payments of $200,000 cash and share issuances equivalent to $200,000 by December 19, 2028.

Meanwhile exploration has begun at the Silvergold Mountain project in the prolific Mulatos gold belt ("**Mulatos**") located in the Sierra Madre Occidental mountains of Sonora, Mexico approximately 200 kilometers east of the city of Hermosillo. Mulatos hosts a number of epithermal gold deposits including the Mulatos Mine operated by Alamos Gold Inc. and the La India Mine operated by Agnico Eagle Mines Limited. BRS has entered into a definitive agreement granting it an option to a 75% interest on mining concessions covering 1,053 hectares (2,602 acres) located in the Mulatos Epithermal Corridor and which constitutes the Silvergold Mountain property and project.

J.W. (Bill) Morton P.Geo, a drector of Cariboo Rose and BRS, is the Qualified Person responsible for the content of this news release

ABOUT BRS RESOURCES LTD.

BRS Resources Ltd. is a mineral exploration company focused on the identification, evaluation, and acquisition of mineral exploration properties using sustainable and innovative practices.
