

Rocket Doctor Joins National Coalition Advocating for Permanent Medicare Telehealth

- *Rocket Doctor Inc. joins the Alliance for Connected Care's Telehealth Voters Pledge, supporting permanent Medicare telehealth legislation in the United States.*
- *Co-Founder and COO Harry Cherniak will travel to Washington, D.C. to join healthcare leaders in advocating for long-term telehealth policy before Congress.*
- *The initiative reflects Rocket Doctor's commitment to expanding access to physician-led virtual care for seniors, rural communities, and underserved populations.*

Vancouver, BC – July 21, 2026 – Rocket Doctor AI Inc. (CSE: AIDR, OTC: AIRDF, Frankfurt: 939) ("Rocket Doctor AI" or the "Company") today announced that its wholly owned digital health platform and marketplace subsidiary, Rocket Doctor Inc., has joined the Alliance for Connected Care's Telehealth Voters Pledge, a growing national coalition advocating for permanent Medicare telehealth legislation in the United States.

As part of the initiative, Harry Cherniak, Co-Founder and Chief Operating Officer of Rocket Doctor Inc., will travel to Washington, D.C. on 23rd July to join healthcare leaders, clinicians, patient advocates, and industry organizations in presenting the pledge to Members of Congress. The coalition is working to encourage permanent Medicare telehealth legislation, replacing temporary extensions that have created uncertainty for patients and healthcare providers across the country.

The Alliance for Connected Care launched the nonpartisan initiative to ensure permanent Medicare telehealth remains a national policy priority throughout 2026. [Over 130 participating organizations](#) from across the healthcare spectrum (including national associations; healthcare systems; rural health; leading industry telehealth organizations; large enterprises) have committed to educating policymakers and the public, sharing patient outcomes and clinical evidence, and advocating for long-term policies that preserve access to virtual healthcare for millions of Americans.

For Rocket Doctor Inc., the initiative aligns closely with its mission of improving access to physician-led care through technology, particularly for seniors, rural communities, underserved populations, and patients managing chronic conditions.

"Telehealth has fundamentally changed how patients access care, but millions of Americans continue to face uncertainty every time temporary Medicare provisions approach expiration," said Dr. William Cherniak, Co-Founder and Chief Executive Officer of Rocket Doctor Inc.

"Permanent Medicare telehealth policy would provide the stability patients, physicians, and healthcare organizations need to continue investing in innovative models of care. We're proud

to join this coalition and help advocate for policies that improve access to high-quality healthcare for those who need it most."

Rocket Doctor has witnessed firsthand the impact virtual care can have on improving healthcare access. Through its physician-led digital health platform and marketplace, the company has supported more than 750,000 patient visits, empowering more than 350 physicians to deliver timely care across Canada and the United States. In the U.S., Rocket Doctor is now in-network with payers representing approximately 21 million covered lives. This enables eligible individuals across California, New York, and Maryland to access care from physicians utilizing Rocket Doctor's platform through Medicare, Medicaid, Veterans Affairs, and commercial insurance.

"Healthcare shouldn't depend on where someone lives or whether Congress passes another short-term extension," said Harry Cherniak, Co-Founder and Chief Operating Officer of Rocket Doctor Inc. "We're honoured to stand alongside healthcare organizations from across the United States to advocate for permanent Medicare telehealth. Providing certainty around virtual care will help patients, physicians, and health systems continue building more accessible and sustainable models of care."

[The advocacy effort comes at a pivotal time as policymakers consider the future of Medicare telehealth coverage.](#) Temporary extensions have enabled millions of seniors and other Medicare beneficiaries to access physician care remotely, but repeated short-term renewals have created ongoing uncertainty for providers, health systems, and patients alike.

By joining the Alliance for Connected Care's Telehealth Voters Pledge, Rocket Doctor reinforces its commitment to helping shape policies that expand access to high-quality, physician-led virtual care while supporting more resilient and equitable healthcare systems across the United States.

About Rocket Doctor AI Inc.

Rocket Doctor AI Inc. delivers physician-built, AI-powered solutions designed to make high-quality healthcare accessible throughout the entire patient journey. A cornerstone of the company's proprietary technology is the Global Library of Medicine (GLM), a clinically validated decision support system developed with input from hundreds of physicians worldwide.

Alongside the GLM is Rocket Doctor Inc, and its AI-powered digital health platform and marketplace. Having helped empower over 350 MDs to provide care to more than 750,000 patient visits, our proprietary technology software and systems enable doctors to independently launch and manage their own virtual or hybrid in-person practices - improving efficiency, restoring autonomy to MDs, and expanding patient access to care.

By reducing administrative burdens and ensuring greater consistency in care, our technology creates more time for meaningful physician-patient interactions. We are committed to reaching underserved, rural, and remote communities in Canada who often lack access to family doctors

and supporting patients on Medicaid and Medicare in the United States. With advanced AI, large language models, and connected medical devices, Rocket Doctor AI is redefining modern healthcare - making it more scalable, equitable, and patient-centered.

Cautionary Statements

This news release contains forward-looking statements relating to the future operations of Rocket Doctor AI Inc. and other statements that are not historical facts. Forward-looking statements are often identified by terms such as "will", "may", "should", "anticipate", "expects" and similar expressions. All statements other than statements of historical fact, included in this release, including, without limitation, statements regarding the Company's participation in and advocacy through the Alliance for Connected Care's Telehealth Voters Pledge, the anticipated enactment of permanent Medicare telehealth legislation and the anticipated benefits thereof for the Company's operations and patient access, the Company's continued growth and network expansion across North America, the ability of the Company to attract and retain enterprise healthcare partners, the expansion of the Company's coverage and reimbursement network, and future plans and objectives of Rocket Doctor AI Inc., are forward-looking statements that involve risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Important factors that could cause actual results to differ materially from Rocket Doctor AI Inc.'s expectations include the risk that permanent Medicare telehealth legislation may not be enacted, or may be enacted on terms that are less favorable than anticipated, risks relating to changes in U.S. federal healthcare policy and reimbursement frameworks, risks relating to coverage and reimbursement determinations under Medicare, Medicaid, and Veterans Affairs programs, risks relating to cybersecurity and data privacy regulation in Canada and the United States, and other risks detailed from time to time in the filings made by Rocket Doctor AI Inc. with securities regulators.

The reader is cautioned that assumptions used in the preparation of any forward-looking information may prove to be incorrect. Events or circumstances may cause actual results to differ materially from those predicted, as a result of numerous known and unknown risks, uncertainties, and other factors, many of which are beyond the control of Rocket Doctor AI Inc. The reader is cautioned not to place undue reliance on any forward-looking information. Such information, although considered reasonable by management at the time of preparation, may prove to be incorrect and actual results may differ materially from those anticipated. Forward-looking statements contained in this news release are expressly qualified by this cautionary statement. The forward-looking statements contained in this news release are made as of the date of this news release and Rocket Doctor AI Inc. will only update or revise publicly the included forward-looking statements as expressly required by Canadian securities law.
